

# SUPPLY CHAIN MANAGEMENT GRADUATE CERTIFICATE

---

The Graduate Certificate in SCM is designed for professionals seeking advanced, applied knowledge in supply chain management. The certificate provides specialized training in areas such as procurement, logistics, analytics, and resilience – preparing students for leadership roles across industries.

## Learning Goals and Outcomes

1. Enable professionals to gain advanced skills in supply chain decision-making and analytics.
2. Provide formal recognition of SCM expertise, strengthening graduates' competitiveness in the job market.
3. Offer a pathway into further graduate study at our university, including the MS in Business Intelligence and Analytics, where students can expand their knowledge into SCM as well as traditional BI&A and AI/ML.
