

# MANAGEMENT

In concert with the Ignatian vision of intellectual excellence informed by conscience, our mission as the Department of Management is to develop leaders who have a broad, value-oriented perspective, and who are able to integrate many dimensions of organizations—behavioral, cultural, economic, environmental, ethical, historical, international, legal, and structural—in making balanced and responsible decisions that affect their organizations, their stakeholders, and themselves. We prepare students to continue in life as creative, highly skilled and intellectually curious learners who exhibit rigorous, moral, and stakeholder-based discernment in their actions and decision-making. Toward fulfilling our mission, the management faculty is committed to listen and advise you toward achieving your goals and objectives.

## Faculty

The faculty and staff in the Department of Management stem from high-level backgrounds with Fortune 100 companies in consulting, law, auditing, business management, entrepreneurship and more. Faculty and staff are deeply dedicated to sharing their business knowledge and experience and preparing students for successful careers after graduation.
