Students will isolate and interrogate social and economic class stereotypes, misconceptions, and attitudes concerning a variety of jobs and professions as well as possible origins for these perceptions. The concept of occupational identity is introduced to illustrate how work can consume us (positively and negatively), how we can assume our working role as part of our understanding of "self," and how we see others based on our attitudes about their occupational roles. Discussions will tackle definitions of success, legacy, respectability, prestige, materialism, workaholism, stress, and professionalism and how our definitions are influenced by personal and cultural values.
