DOCTOR OF PHARMACY/ MASTER OF BUSINESS ADMINISTRATION

The addition of a Master of Business Administration (MBA) compliments the Doctor of Pharmacy (PharmD) degree by expanding career opportunities including roles in the pharmaceutical industry, healthcare management, and executive positions for pharmacists. Students will gain valuable business skills that complement clinical pharmacy knowledge, including management, marketing, and finance giving graduates a competitive advantage in the job market following graduation.

Any student that is accepted in the Doctor of Pharmacy (PharmD) program may apply for acceptance if they:

- Have a minimum GPA of >3.0
- · Are at the first professional year (P1) level or higher
- Have completed their general education credits or have previously earned a Bachelor's degree

For students in the direct entry program who have not yet earned their Bachelor of Science (BS) degree:

- Students will be issued a conditional acceptance to the dual degree program until they apply for BS graduation
- Would only be permitted to take nine credits of MBA coursework prior to obtaining the BS degree at the end of the second professional year (P2)

Learning Goals and Outcomes Doctor of Pharmacy

The Doctor of Pharmacy (PharmD) Program reflects PCP's commitment to create and foster dedicated pharmacists who will have a moral commitment to improve the quality of life of individual patients and positively impact society by being an integral part of the healthcare team. Thus, our graduates will be compassionate, knowledgeable, skilled and innovative, job-ready pharmacy practitioners, who will become trusted and respected leaders of the pharmacy profession. They will be able to adapt to the dynamic nature of the healthcare system and changing technology and serve as positive role models in the community. The program will foster these ideals by providing a strong scientific education and the skills and attitudes needed in entry-level pharmacists roles now and in the future.

Master of Business Administration

Goal 1: Leadership

Outcome 1.1: Students will demonstrate an understanding of what leadership entails, that is, to foster the motivation, inspiration, and direction skills necessary for an organization to achieve its goals.

Goal 2: Stakeholder Value/Functional

Outcome 2.1: Students will demonstrate both breadth and depth of knowledge in the major *functional* areas of the organization, including the *interpersonal skills* needed for success within organizations; students will develop an understanding of the

concept of value, the role of the different business functional areas in value creation, and how the value creation activities of the organization impact company stakeholders including owners, employees, customers, local communities, interest groups and society as a whole.

Goal 3: Problem Solving/Critical Thinking

Outcome 3.1: Students will develop *critical thinking skills*, that is, the process of conceptualizing, applying, analyzing, synthesizing, and/or evaluating information as the basis for solving problems and making decisions.

Goal 4: Ignatian Values

Outcome 4.1: Students will develop an appreciation for and ability to apply Ignatian values - an insistence upon ethical decision making and a desire for social justice – to business decisions.

Goal 5: Global/Diversity

Outcome 5.1: Global/Diversity: Students will develop a global business perspective; will understand major economic, political and cultural differences and influences in different regions of the world; and will develop an understanding of and respect for diversity in the population and in organizations related to differences across cultures, ethnic groups, socio-economic groups, gender and sexual orientation.
